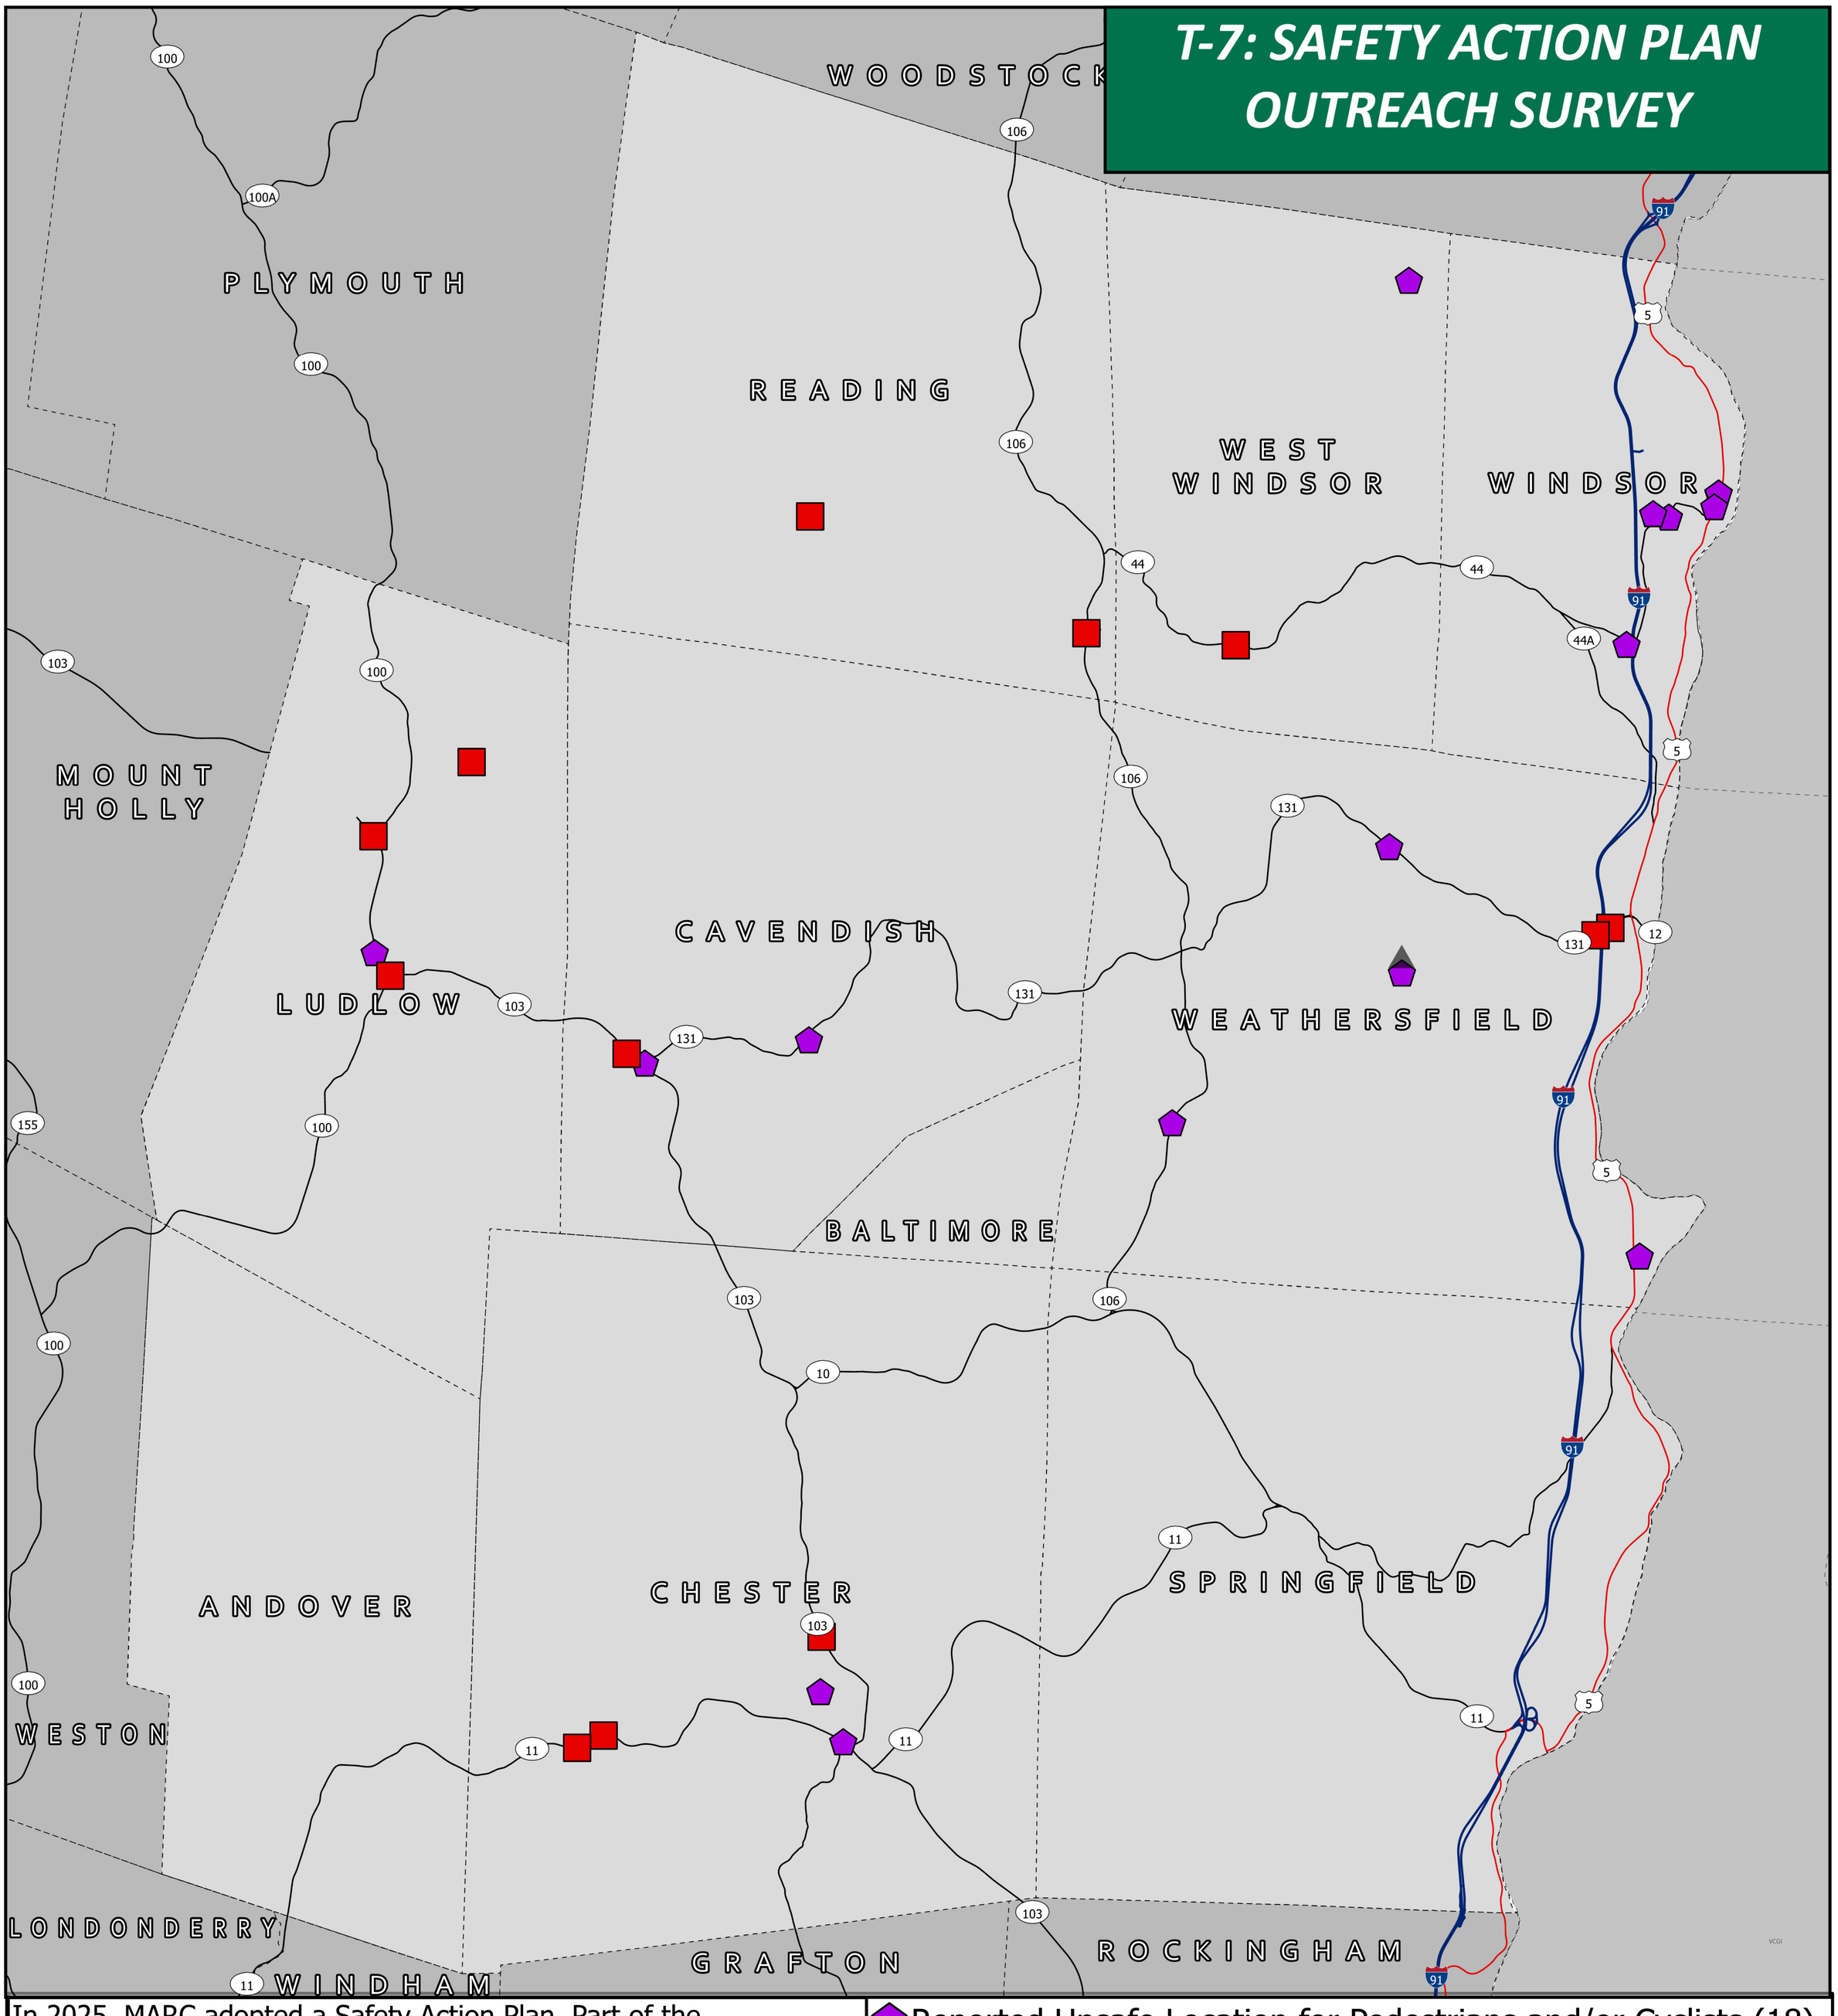
T-7: SAFETY ACTION PLAN OUTREACH SURVEY



In 2025, MARC adopted a Safety Action Plan. Part of the development of this plan included public outreach to identify areas of public concern or safety in the region's transportation network.

As a part of this survey, respondents were asked to report an area of particular safety or unsafety in the region. Respondents were asked to give a brief description of the area, name the types of transit involved, and suggested improvements. In total, MARC received 52 responses -- areas identified as "unsafe" are pictured here.

Respondents were more likely to report unsafe areas for pedestrians or cyclists than for drivers. Unsafe areas tended to be within town centers rather than along regional or rural roads.

- Reported Unsafe Location for Pedestrians and/or Cyclists (18)
- Reported Unsafe Spot for Drivers (12)
- Other Unsafe Spot (1)

Data Sources: Survey Data, VHB/MARC. Road Data Derived from ALL ROADS (VTrans, 2025). Town and RPC Boundaries (VCGI 2025)

Adoption info: Adopted July 27, 2026
