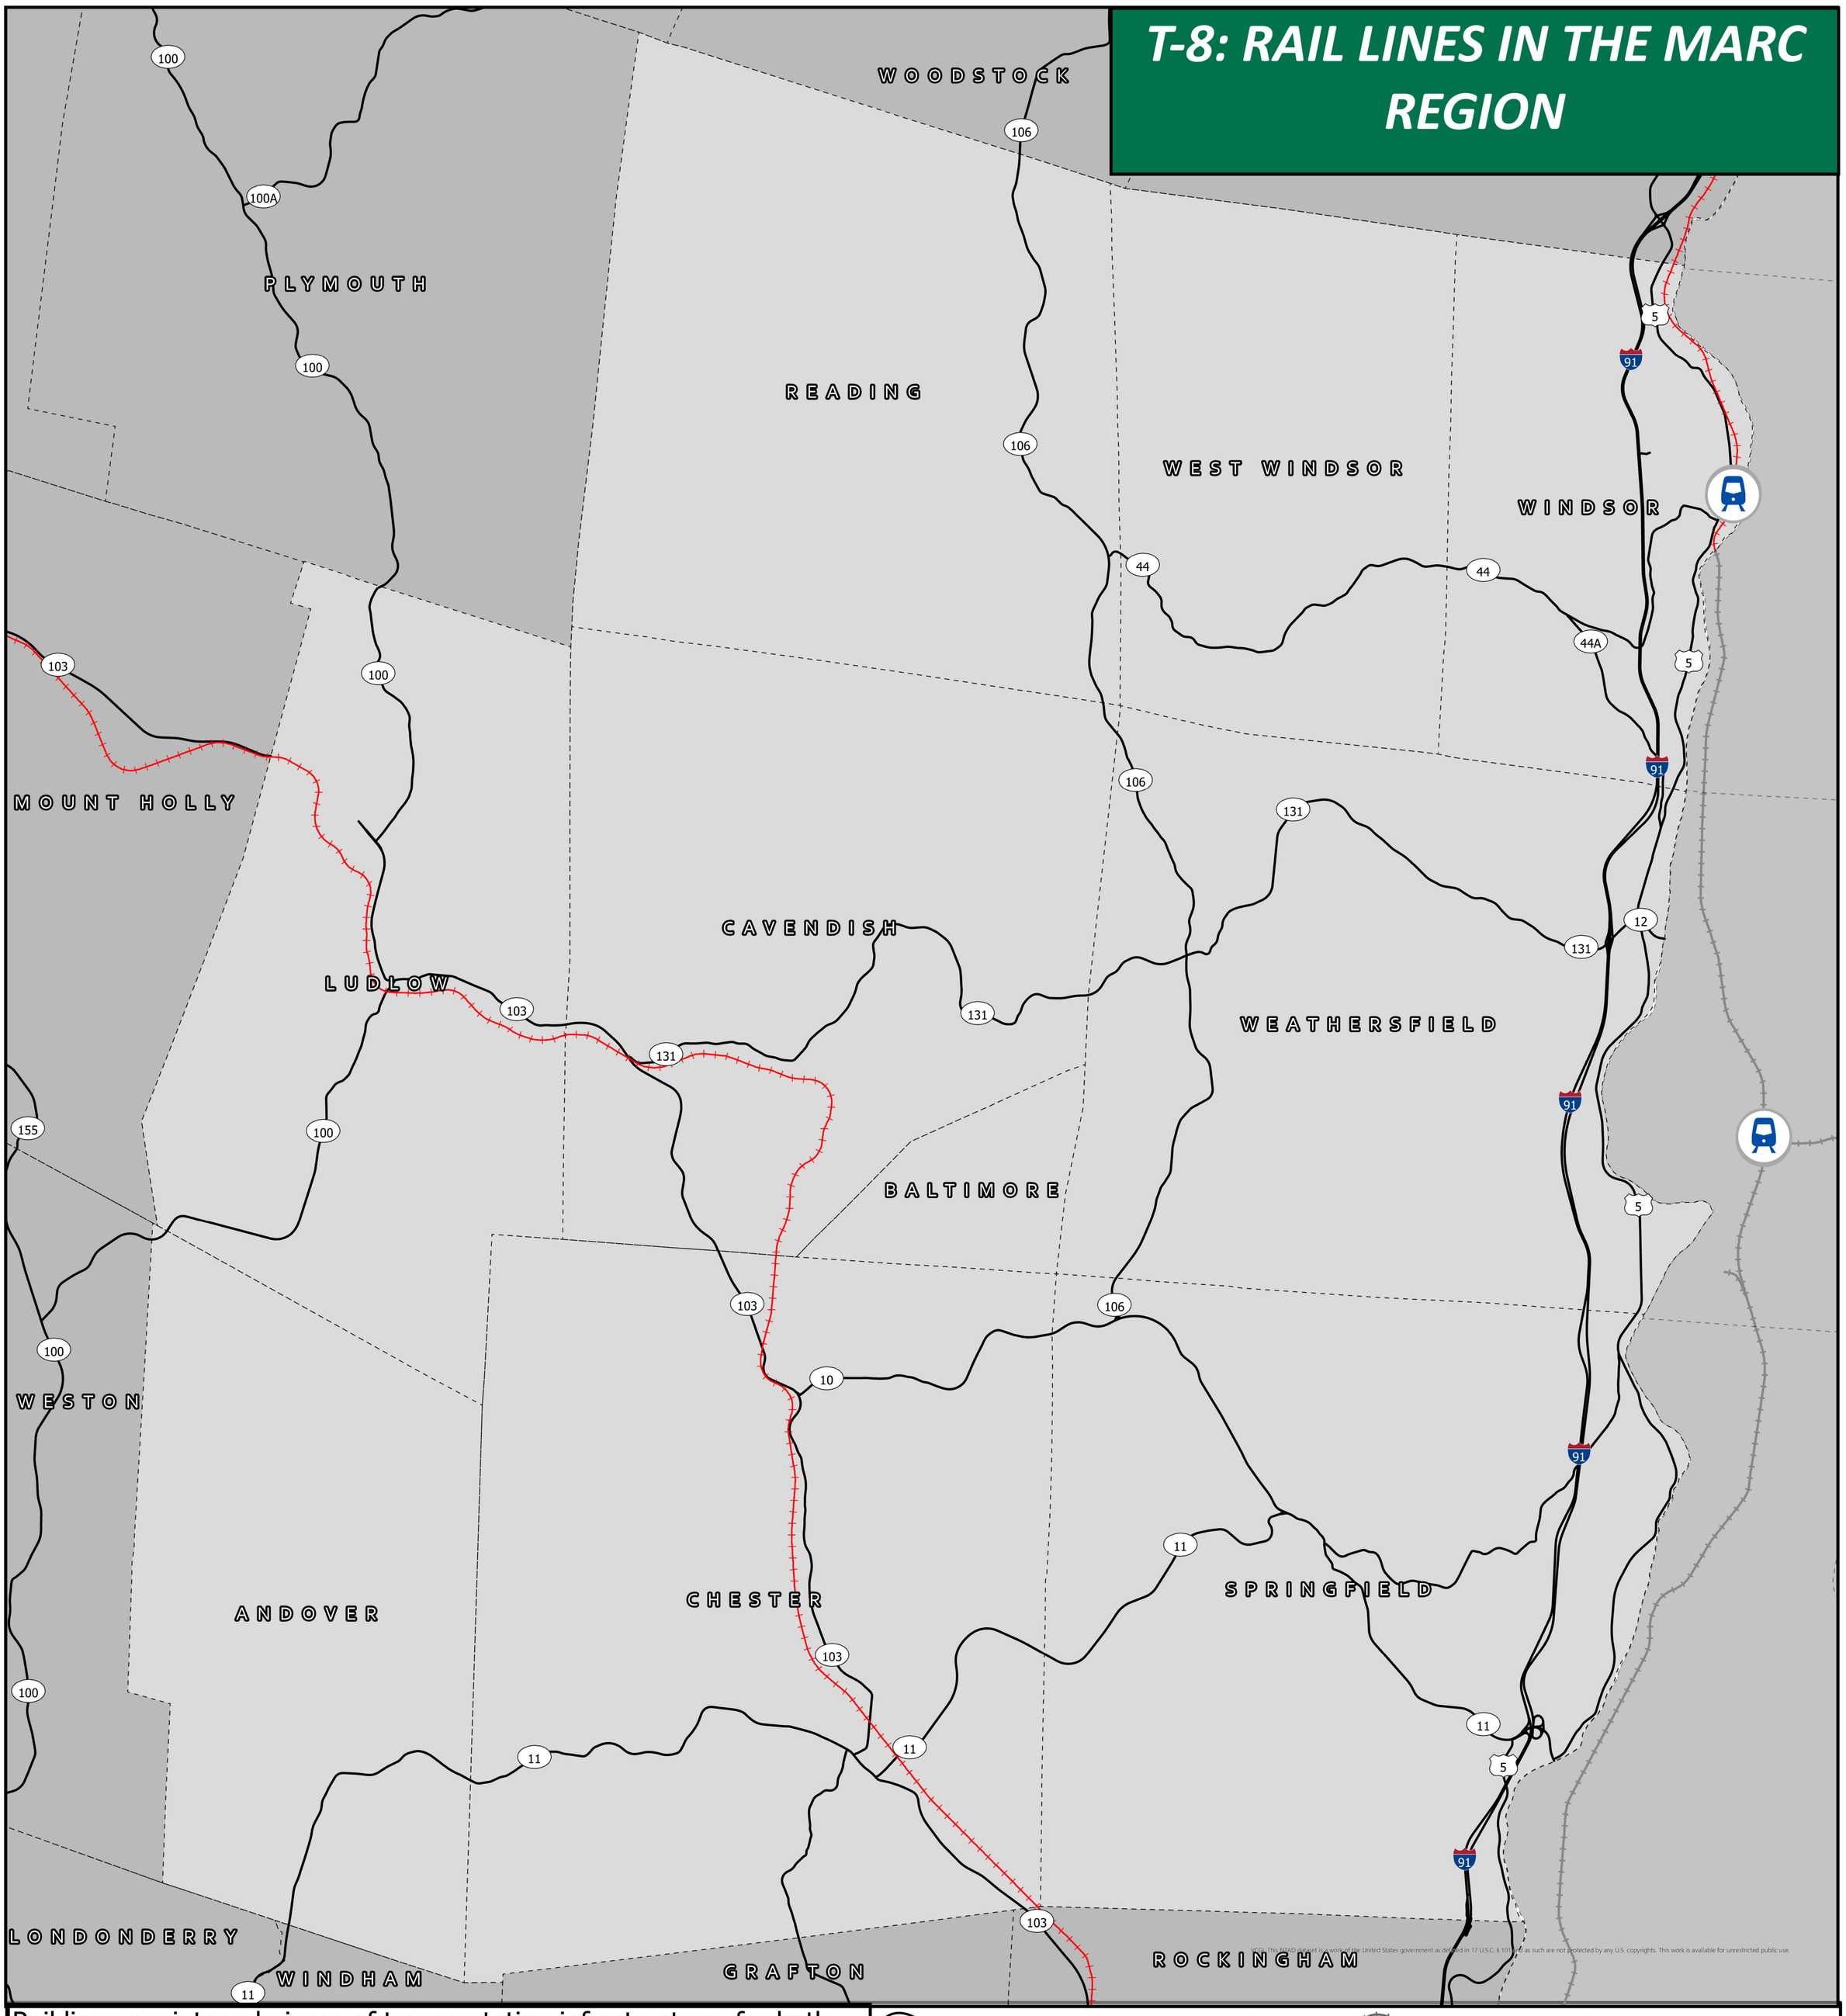
T-8: RAIL LINES IN THE MARC REGION



Rail lines are integral pieces of transportation infrastructure, for both passengers and freight. Rail lines support regional interconnectivity, public transportation, and business development by allowing cheap and reliable movement.

The New England Central Railroad's lines enter the region in Windsor, following the Connecticut River north/south between White River Junction and Brattleboro. The lines cross into NH and run just outside the region before re-entering Vermont in Bellows Falls. This line carries Amtrak's Vermonter passenger service as well as freight.

The Green Mountain Railroad Company's line traverses the state from Bellows Falls to Rutland, passing through Chester, Cavendish, and Ludlow along the way. This line is primarily a freight line, but carries occasional tourist passenger trains.
